

Good News About Your Credit Card

Dental Insurance:

Dental insurance plans have gotten so complex that no dentist can estimate coverage exactly. To accept your insurance, we therefore ask you to keep a credit card on file. When we get your insurance payment, we automatically bill your card if you owe additional co-payment. More important: we'll credit you immediately if you over paid. Credit cards are also excellent for payment plans. Ask how you can make them interest free!

Nothing New:

The authorization you sign has been used throughout the country for years. It is the same authorization you sign when you check into a hotel, rent a car or select automatic payments for mortgages, loans, insurance premiums, health club memberships, internet service or other recurring charges.
